

# Clear Stickers & Decals

## Wet Application Instructions

Wet Application Method works best for Clear Stickers and Decals **larger than 4"**. This method only works on waterproof surfaces. If your surface is not waterproof, you can simply and carefully peel and stick your clear decal onto your surface.

- 1 CLEAN** the surface to which the decal will be applied. Avoid applying on a frozen or very cold surface (minimum 50°F or 10°C).

- 2 PEEL** the backing sheet off the decal and lay the decal adhesive-side-up on a table.

- 3 SPRAY** both the adhesive and the installation surface with a mixture of water and a drop of dish soap or baby shampoo.

- 4 PLACE** the decal onto the wet surface and slide into position.

- 5 SMOOTH** the decal using a credit card wrapped in paper towel or an installation squeegee. Work from the center of the decal towards the edges to push the air and water out.

- 6 DRY** the surface and enjoy your clear decal!
