

Custom Logo Wall Decals

Application Instructions

- 1 CLEAN** the wall area where decal will be applied. Just water will do, but water and any mild cleanser is best. Let the wall dry.

- 2 PEEL** the decal slowly off the backing paper. Do this on a table or ask for assistance. Be careful not to rip the decal.

- 3 PLACE** the decal on the wall where it will be applied. It helps to have an assistant to help you hold and position it. Use a level if needed.

NOTE: If the decal sticks to itself during application, simply peel it off slowly and carefully.

- 4 SMOOTH** out any air bubbles using your hands, a squeegee or credit card.

- 5 REMOVE** your decal by simply peeling it off the wall slowly and carefully from any edge.

Enjoy Your Wall Decal!
