

Temporary Tattoos

Application Instructions

1. Cut out your tattoo from the page. For best results, cut closely to the contour of your tattoo image.
2. Peel away the clear protective plastic layer to expose the adhesive
3. Apply the tattoo's adhesive side to your skin and cover with a wet cloth for 10-15 seconds, or until paper backing slides off easily.
4. Tattoos are intended to last a few days, but may come off faster after a shower or bath. To remove, saturate tattoo with baby oil for 10 - 15 seconds, then wipe away with cotton ball or tissue.

CAUTION

Do not apply to sensitive skin, or if allergic to adhesive. Wearing tattoos in chlorinated water is not recommended as the adhesive can become more difficult to remove.

NOTE

Wrinkles and air bubbles may occur on your tattoo page during our production process. Be advised that the tattoo adhesive will still work as expected regardless of this appearance.
